Projects

Project A:- Classification Of Fake News Spreading Over Media(NLP Project).
Details: Using Bi directional LSTM(RNN),Word Embedding Technique and Some python libraries such as Tensorflow, NLTK Create a Deep Learning Model to classifying the news whether it is fake o not.
Project B:- Solving 1D Partial Differential Richards Equation Through Python(Civil Hydrology Project)
Details: Using python libraries such as Matplotlib and Numpy We plotted graph between various Hydrolic Properties Of different soils.

TECHNICAL SKILLS

1. Computer Programming Languages: C, C++, Python ,HTML ,CSS ,JS
2. Database & Analysis tools: Basic SQL & MySql
3. Data Structures And Algorithms (DSA)
4. Knowledge about Data Analytics (Microsoft Power BI)
5. Machine Learning And Natural Language Processing

ACHIEVEMENT

A : Solved 450+ coding problems on Leetcode & GFG platform
B : Achieve 3-star on Codechef platform

Courses

1. Machine Learning A-ZTM: Hands-On Python And R In Data Science (On Udemy)
2. Deep Learning A-ZTM: Hands-On Artificial Neural Networks (on Udemy)
